Process Standard 2: Classify - Classifying establishes order. Objects, organisms, and events are classified based on similarities, differences, and interrelationships. The student will accomplish these objectives to meet this process standard.

1. Classify a set of simple objects, familiar organisms, and/or observable events by observable properties.

Process:

Using the field guides, DVD's and Internet resources listed above as reference materials. The learner will sort the pictures of butterflies and moths into two separate categories: Butterflies - Moths

A variety of pictures of butterflies and moths are available on the Internet for use as manipulatives with this sorting activity. **www.butterfliesandmoths.org/gallery**
