

DINO DIG

with 2 household ingredients!

Dinosaur Fossil Excavation

Supplies Needed:

- *Cornstarch*
- *Water*
- *Dinosaur toys*
- *Toy tools or gadgets*
- *Paintbrush or toothbrush*

1. Mix up some oobleck by combining cornstarch and water. You will use twice as much cornstarch as water. If it is too soupy, add more cornstarch. If it is too thick, add more water.
2. Put the dinosaurs into the oobleck. You will want to push them down until they are buried.
3. Put the oobleck outside in the sun and leave it for a day or two. When it gets hard and starts to crack all over the surface, then it is ready!

Digging for Dinosaur Bones

Grab your toy tools, gadgets, or any other tools you think could be used to excavate and dig out the dinosaurs!

Digging for Dinosaur Bones

Once the dinosaurs are free grab a paintbrush or toothbrush to dust them off. Now, you have your own dinosaur fossils to play with. Enjoy!
