

Compare and Contrast Halloween and Día de los Muertos

This activity uses a Venn diagram to help students compare the popular fall holidays Halloween and Día de los Muertos using the book, *Vamos! Let's Celebrate*. Teachers will lead the discussion to help students sort out what is similar or different about the holidays.

1. Read the book out loud to the class as a whole or in small groups.
2. Introduce what a Venn diagram looks like and explain how it is used.
3. On the smartboard, draw a Venn diagram and pass out copies of the attached Venn diagram or have students draw their own on a blank sheet of paper.
4. Begin by asking students what the two holidays have in common, then ask how they are different. Write their answers in the diagram. Students can follow along using the printed diagram.
